UXO	Unexploded Ordnance
VCP	Voluntary Cleanup Program

1.0 Introduction

The Delaware Department of Transportation (DelDOT), in cooperation with the Federal Highway Administration (FHWA), is evaluating the relocation and upgrade of Park Avenue in the southern portion of the Georgetown area in Sussex County, Delaware. Pursuant to the National Environmental Policy Act of 1969 (NEPA), as amended, and in accordance with FHWA regulations, an Environmental Assessment (EA) has been prepared to analyze and document the potential social, economic, and environmental effects associated with the proposed transportation improvements.

The purpose of this Technical Report is to identify and assess hazardous materials that may potentially affect the Preferred Alternative. Information in this report, described below, supports discussions presented in the EA.

- **Section 1** presents an introduction to the Park Avenue Relocation Hazardous Materials Technical Report;
- **Section 2** describes the methodology utilized to identify and assess the hazardous materials database search;
- **Section 3** provides an overview of the database results;
- **Section 4** discusses the sites with associated database listings;
- **Section 5** provides the sites associated with Recognized Environmental Conditions (RECs) and Controlled RECs.

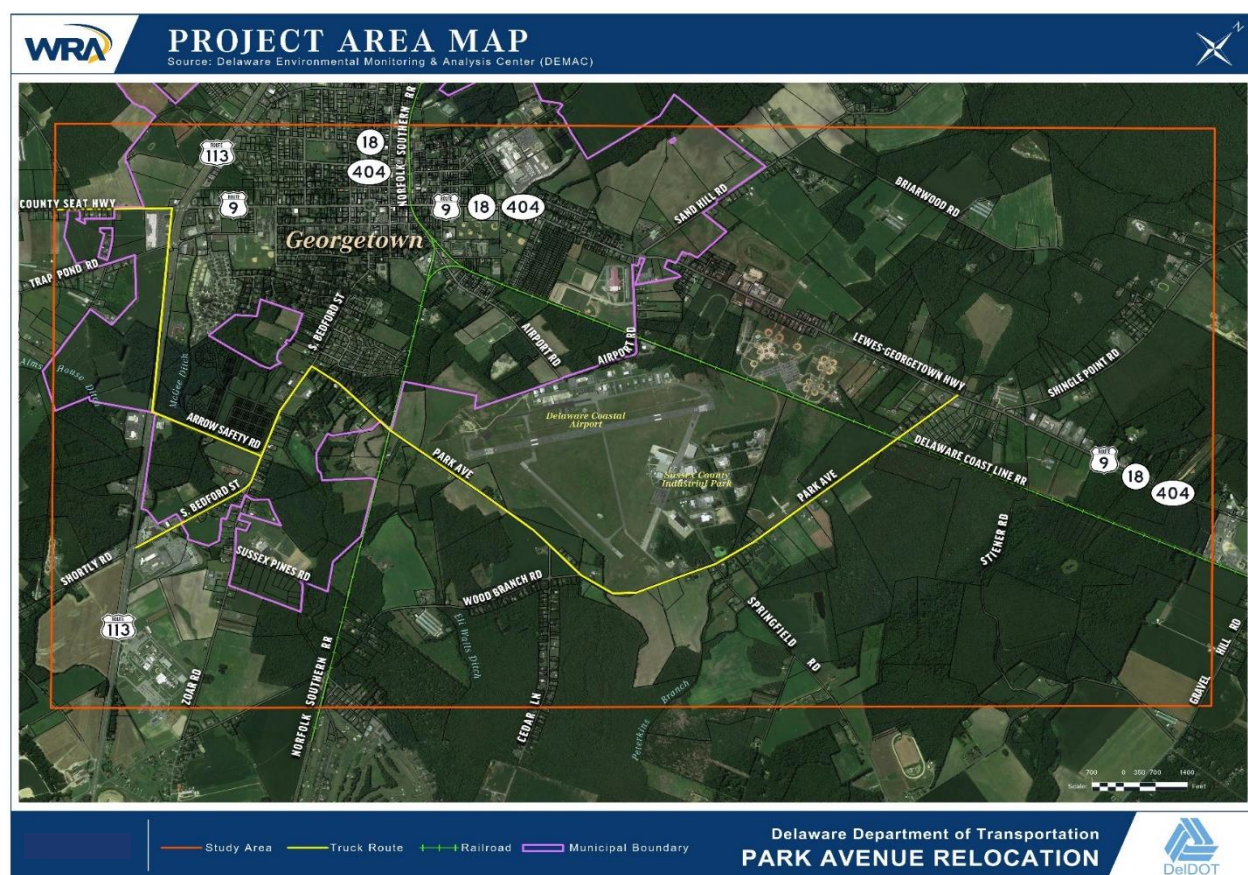

1.1 Description of the Study Area

The project's Study Area extends from one-half-mile east of Park Avenue to one-quarter-mile west of US 113, and includes the majority of the Town of Georgetown, the Delaware Coastal Airport, and the Sussex County Industrial Park (refer to **Figure 1-1**). The Study Area was developed based upon review of the land use in the area. The area in the vicinity and to the south of Park Avenue, South Bedford Street, and Arrow Safety Road is predominantly industrial or is planned to be industrial with pockets of residences, farmland, wetlands, and forested areas, as well as a new residential development planned north of Arrow Safety Road. The roadways further south of Park Avenue and South Bedford Street, such as Wood Branch Road, support low density residential development. Residential mixed with commercial uses border US 9 and DuPont Boulevard (US 113); while the majority of the vacant developable land between these roadways is designated for future residential development (Sussex County, 2008).

1.2 Background

Park Avenue, also known as US Route 9 Truck Bypass, is the designated truck route for tractor trailers moving through the area, providing access to the Sussex County Industrial Park, southeast of the Delaware Coastal Airport. Sussex County's 2017-2022 Capital Transportation Program Request has identified Park Avenue as a priority for improvement (Sussex County, 2015). DelDOT's Capital Transportation Plan for fiscal year (FY) 2017-2022, the currently approved plan, authorizes funding for preliminary engineering and right-of-way for the project (DelDOT, 2017). The report and plan note that the roads used for the truck bypass should be upgraded, with appropriate turn lanes and signalized intersections, and that the truck route should be realigned, removing the truck route from the existing residential areas of Park Avenue and South Bedford Street (Sussex County, 2015 and DelDOT, 2017).

Figure 1-1: Project Area Map

1.3 Existing Conditions

US 9 travels through the Town of Georgetown connecting Laurel, Delaware with Lewes, Delaware. West of US 113, US 9 is known as County Seat Highway; east of US 113, US 9 is known as Lewes-Georgetown Highway (refer to **Figure 1-1**). To eliminate truck traffic through the center of Georgetown, DelDOT designated a truck bypass which begins at County Seat Highway (US 9) west of Georgetown, then follows US 113, Road 87 (Arrow Safety Road), Road 431 (South Bedford Street), and Park Avenue, and reconnects with Lewes-Georgetown Highway (US 9) east of Georgetown. The five-mile bypass requires that trucks turn at five intersections and cross two railroads at-grade, the Norfolk Southern Line east of South Bedford Street on Park Avenue and the Delaware Coast Line south of Lewes-Georgetown Highway (US 9) on Park Avenue. The bypass is the only access route to the Sussex County Industrial Park and is a main route to the Delaware Coastal Airport (formerly the Sussex County Airport).

1.4 Purpose and Need

The purpose of the Park Avenue relocation, being undertaken by DelDOT, is to improve the traffic operations and safety of the US 9 truck bypass from east of Georgetown to US 113.

The primary need for the Park Avenue project is to improve traffic operations and safety. The existing truck route between US 9 and US 113 has several turning movements that hinder traffic operations, the roadway width is narrow and does not meet current design for a truck route, and the average number of crashes along the truck route between US 113 and US 9 is higher than the state and Sussex County averages.

Secondary needs are to support economic growth and to support federal, state, and local initiatives by focusing on improving transportation infrastructure to provide safe and convenient road access across the region and to areas zoned for business/industrial use.

1.5 Alternatives Considered for Evaluation

Conceptual alternatives that could potentially address the Purpose and Need for study were developed and then screened and compared by DelDOT during the conceptual design phase based on criteria developed to determine whether or not the identified elements of Purpose and Need would be met. The alternatives evaluated as well as the screening criteria are described in **Chapter 2.0** of the EA. Following is a description of the two alternatives carried forward for evaluation.

1.5.1 No-Build Alternative

Under the No-Build Alternative, no improvements to or relocation of Park Avenue would be undertaken; however, routine maintenance of the US 9 truck route would continue. The No-Build Alternative would not satisfy the identified needs of the project as it would not improve traffic operations and safety along Park Avenue. The No-Build Alternative is also inconsistent with local plans and would not accommodate growth at the Delaware Coastal Airport (Town of Georgetown, 2010; Sussex County, 2008, 2015, and 2016). The No-Build Alternative has been carried forward in this EA as a benchmark for assessing the transportation benefits and environmental impacts of Build Alternative 6, the Preferred Alternative.

1.5.2 Preferred Alternative

The Preferred Alternative would begin at Arrow Safety Road and straighten the alignment of the truck bypass by creating an additional leg at the intersection with South Bedford Street. The alternative would then travel along a new alignment to connect to Park Avenue east of the Norfolk Southern Railroad tracks. This alternative would avoid the runway object free area (ROFA) as well as the central portion of the runway protection zone (RPZ) associated with the proposed growth of the Delaware Coastal Airport, and minimize wetland impacts.

This truck route relocation would improve traffic operations by improving the roadway alignment and typical section, providing a continuous route around Georgetown, connecting US 113 west of Georgetown to US 9 east of Georgetown, and improving the Park Avenue and US 9 intersection and the Park Avenue and South Bedford Street/Arrow Safety Road intersection. The Preferred Alternative is consistent with local plans and allows for the future growth of the Delaware Coastal Airport as proposed by Sussex County, thus potentially encouraging economic development in the region (Town of Georgetown, 2010; Sussex County, 2008, 2015, and 2016).

2.0 Methodology

In order to identify and assess hazardous materials, potentially effecting or affected by the Build Alternatives under evaluation, Environmental Data Resources, Inc. (EDR) was utilized to perform a search of federal and state regulatory agency databases within a ½-mile radius from the center line of the proposed roadway to identify sites with potential RECs. The **EDR DataMap™ Area Study** report for the Park Avenue Relocation project is included as **Appendix A** to this technical report. The databases that were queried to generate the EDR report, included as **Appendix A**, are defined in **Table 2-1**.

Table 2-1: Federal Databases Searched By EDR

Database	Definition
NPL	National Priorities List (Superfund). Hazardous waste sites targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS).
Proposed NPL	Proposed National Priority List Sites.
NPL LIENS	Federal Superfund Liens.
Delisted NPL	National Priority List Delisted The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establish the criteria that Environmental Protection Agency (EPA) uses to delete sites from the NPL.
SEMS	SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS.
SEMS-ARCHIVE	SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS- No Further Remedial Action Planned (NFRAP).
FEDERAL FACILITY	Federal Facility Site Information listing. A listing of NPL and Base Realignment and Closure (BRAC) sites found in CERCLIS Database where the EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.
CORRACTS	Resource Conservation and Recovery Act Corrective Action Sites (CORRACTS). Hazardous waste handlers with Resource Conservation and Recovery Act (RCRA) corrective action activity.
RCRA-TSDF	Resource Conservation and Recovery Information System (RCRIS), Treatment, Storage, and Disposal (TSD) facilities. Hazardous waste handlers.
RCRA-LQG	RCRIS sites that are large-quantity generators (LQG) of hazardous waste. LQGs generate over 1,000 kg of hazardous waste, or over 1 kg of acutely hazardous waste per month.
RCRA-SQG	RCRIS sites that are small-quantity generators (SQG) of hazardous waste. SQGs generate between 100 kg and 1,000 kg of hazardous waste per month.
RCRA-CESQG	RCRA-Conditionally Exempt Small Quantity Generators (CESQG). CESQGs generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
RCRA-NonGen/NLR	RCRA - Non Generators / No Longer Regulated NLR).
US ENG CONTROLS	Engineering Controls Sites List. A list of sites with engineering controls in place including various forms of caps, building foundations, liners, and treatment methods.
US INST CONTROL	Sites with Institutional Controls. A listing of sites with institutional controls in place, including administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements.
LUCIS	Land Use Control Information System (LUCIS). Contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.
ERNS	Emergency Response Notification System (ERNS). Releases of oil and hazardous substances.

Database	Definition
US BROWN-FIELDS	A listing of Brownfield sites.
DEBRIS REGION 9	Torres Martinez Reservation Illegal Dump Site Locations. A listing of illegal dump sites located on the Torres Martinez Indian Reservation located in eastern Riverside and northern Imperial County, California.
ODI	Open Dump Inventory (ODI): Disposal facility that does not comply with one or more of Code of Federal Regulations (CFR) Part 257 or Part 258 Subtitle D Criteria.
US CDL	Clandestine Drug Labs (CDL) Database. Locations listed by the U.S. Department of Justice.
US HIST CDL	A listing of historical clandestine drug lab locations.
LIENS 2	Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Lien information. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies.
HMIRS	Hazardous Materials Information System Database (HMIRS). A list of release incident information reported to the Department of Transportation by carriers of hazardous materials.
DOT-OPS	Incident and Accident Data from the Department of Transportation, Office of Pipeline Safety (DOT-OPS) Incident and Accident data.
DOD	Department of Defense (DOD) Sites. Data set of federally owned or administered lands having area equal to or greater than 640 acres of the US, Puerto Rico, and the US Virgin Islands.
FUDS	Formerly Used Defense sites (FUDS) where U.S. Army Corps of Engineers (USACE) will take necessary cleanup actions.
CONSENT	Superfund (CERCLA) Consent Decrees. Major legal settlements that establish responsibility and standard for cleanup at NPL (Superfund) sites.
ROD	Records of Decision (ROD). ROD documents mandate a permanent cleanup at an NPL (Superfund) site containing technical and health information to aid in the cleanup.
UMTRA	Uranium Mill Tailing Remedial Action Sites (UMTRA). (Mined by private companies for federal government use in national defense programs.)
US MINES	Mines Master Index File containing all mine identification numbers issued for mines active or opened since 1971.
TRIS	Toxic Chemical Release Inventory System (TRIS). TRIS identifies facilities, which release toxic chemicals into the air, water, and land in reportable quantities.
TSCA	Toxic Substance Control Act (TSCA). An inventory, which includes locations and chemical production of more than 700 processors and manufacturers of chemicals.
FTTS	National Compliance Database tracking administrative cases and pesticide enforcement actions and compliance activities related to Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), TSCA, and Emergency Planning and Community Right-to-Know Act (EPCRA).
HIST FTTS	FIFRA/TSCA Tracking System Administrative Case Listing. Information was obtained from the National Compliance Database. May include data not in newer FTTS database.
SSTS	Section 7 Tracking Systems (SSTS) of the Federal Insecticide, Fungicide, and Rodenticide Act.

Database	Definition
ICIS	Integrated Compliance Information System (ICIS) supports information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.
PADS	Polychlorinated biphenyl (PCB) Activity Database System. The Protected Areas Database (PADS) stores information about facilities that handle PCBs.
MLTS	Material License Tracking System (MLTS). MLTS contains information on sites licensed by the Nuclear Regulatory Commission (NRC) to handle radioactive materials.
RADINFO	Radiation Information Database. EPA regulated facilities for radiation and radioactivity.
RAATS	RCRA Administrative Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA.
RMP	Risk Management Plans (RMP).
FUSRAP	Formerly Utilized Sites Remedial Action Program (FUSRAP). The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.
UXO	Unexploded Ordnance Sites (UXO).
DOCKET HWC	Hazardous Waste Compliance Docket Listing.
FUELS PROGRAM	EPA Fuels Program Registered Listing.
ECHO	Enforcement Compliance History Online (ECHO) provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.
LEAD SMELTERS	Lead smelter sites.
US AIRS	Aerometric Information Retrieval System (AIRS) Facility Subsystem. AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies.
ABANDONED MINES	Abandoned Mines. An inventory of land and water impacted by past mining (primarily coal mining).
IHS OPEN DUMPS	Open Dumps on Indian Land.
US HIST CDL	Delisted National Clandestine Laboratory Register.
FINDS	Facility Index System (FINDS). An inventory of all facilities that are regulated or tracked by EPA.
SCRD DRY-CLEANERS	State Coalition for Remediation of Drycleaners (SCRD) listing.
PRP	Potentially Responsible Parties (PRP). A listing of verified Potentially Responsible Parties.
EPA WATCH LIST	EPA maintains a “watch list” to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority.

Database	Definition
US FIN ASSUR	Financial Assurance Information. All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the cleanup, closure, and post-closure care of their facilities.
PCB TRANS-FORMER	EPA's PCB Transformer Registration Database.
COAL ASH EPA	Coal Combustion Residues Surface Impoundments List. A listing of coal combustion residues surface impoundments with high hazard potential ratings.
COAL ASH DOE	Steam-Electric Plant Operation Data. A listing of power plants that store ash in surface ponds.
2020 COR ACTION	2020 Corrective Action Program List. RCRA cleanup baseline includes facilities expected to need corrective action, including heavily contaminated sites, previously contaminated sites that have been cleaned up, and others that have not been fully investigated.
FEMA UST	A listing of all Federal Emergency Management Agency (FEMA) owned underground storage tanks (USTs).
EDR Proprietary Records	
EDR MGP	Manufactured Gas Plants (MGP). Database including records of coal gas plants used in the US from the 1800's to 1950's.
EDR Hist Cleaner	EDR Exclusive Historic Dry Cleaners.
RGA HWS	Recovered Government Archive (RGA) State Hazardous Waste Facilities List.
RGA LF	Recovered Government Archive Solid Waste Facilities List.
Local (Delaware) Databases	
SHWS	Hazardous Substance Release Sites.
SWF/LF	Solid Waste/Landfill Facilities (SWF/LF). Inventory of solid waste disposal facilities or landfills in a particular state. May be active or inactive facilities, depending on the state, or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.
UIC	Underground Injection Wells Inventory Listing.
SWRCY	Recyclers Directory.
LUST	Leaking Underground Storage Tank Tracking (LUST) Database.
LAST	Leaking Aboveground Storage Tanks (LAST).
UST	Registered Petroleum underground storage tanks (USTs).
AST	Registered Petroleum aboveground storage tanks (ASTs).
SPILLS	The Department of Natural Resources and Environmental Control (DNREC) developed this system to allow Delawareans to learn promptly of releases or discharges of contaminants or pollutants that meet or exceed certain thresholds in their neighborhoods or throughout the state.
INST CONTROL	All sites that have deed restrictions.
VCP	Voluntary Cleanup Program (VCP) Sites.
DRY-CLEANERS	Drycleaner facility listing.

Database	Definition
BROWN-FIELDS	Certified Brownfields.
ENF	Notice of Violations.
NPDES	A listing of wastewater permits.
AIRS	Air Emissions Listing.
TIER 2	A listing of facilities which store or manufacture hazardous materials and submit a chemical inventory report.
Tribal Records	
INDIAN RESERV	Indian Reservations.
INDIAN ODI	Report on the Status of Open Dumps on Indian Lands.
INDIAN LUST	Leaking Underground Storage Tanks on Indian Land.
INDIAN UST	Underground Storage Tanks on Indian Land.
INDIAN VCP	Voluntary Cleanup Priority Listing. A listing of voluntary cleanup priority sites located on Indian Land.

3.0 Results

The EDR report identified a total of 19 sites within the ½-mile search area of the center line of the proposed roadway. Sites were assigned an EDR ID number based on their plotted location within the radius search. Some sites identified by EDR ID numbers are actually clusters of multiple sites and share the same EDR ID number. A total of 15 EDR ID numbers were assigned to the 19 sites. The **EDR DataMap®**, shown in **Figure 3-1**, depicts the EDR ID locations within the ½-mile search radius boundary (dashed green line). Site locations relative to the center line of the proposed roadway are shown by their EDR ID in **Figure 3-1**.

Additionally, the EDR Report also included a list of “Orphan Sites”, which could not be plotted due to insufficient addresses and/or geographic coordinate information. The list of Orphan Sites was reviewed and based on the descriptions provided, the locations of the sites were approximated to determine whether these sites may be located within ½-mile of the center line of the proposed roadway. Two of the Orphan Sites were determined to be located within ½ -mile of the center line of the proposed roadway. The first Orphan Site is in the AST database and the second Orphan Site is in the FINDS database.

Table 3-1 lists information for the 19 sites and the two Orphan Sites, including the facility name and location, EDR ID number, regulatory database information, and the approximate distance to the site from the proposed roadway. Sites determined to be located within 500 feet of the proposed roadway are shaded in grey. The locations of the EDR ID numbers are shown on **Figure 3-1**.

Figure 3-1: EDR Identified Regulatory Sites Within the Study Area

3.1 Field Verification

Field verification is typically performed for sites that were identified with active corrective action or land use controls to determine current site conditions, corrective action efforts, or site remediation. Database information for the 21 sites identified within the search area was assessed to determine whether current site conditions include obvious environmental concerns. None of the sites were identified as having “Open” LUST cases. Therefore, no field verification of sites was performed for this study.

4.0 Discussion

Table 4-1 shows how many regulatory database listings are associated with sites within close proximity (500 feet) to the proposed roadway, between 500 feet and ¼-mile, and between ¼-mile and ½-mile to the proposed roadway. These regulatory database listings included historical environmental cases, incidents/releases, permits, and/or are associated with hazardous material storage and/or generation. Approximately half of the database listings are associated with sites greater than ¼-mile from the proposed roadway; approximately one quarter of the database listings are associated with sites within 500 feet from the proposed roadway; and the last quarter of database listings are associated with sites located between 500 feet and ¼-mile from the proposed roadway.

Table 4-1: Summary of the Results of the Searched Regulatory Databases

Database	Listings Located Within 500 feet of Proposed Roadway	Listings Located Between 500 feet - 1/4-mile of Proposed Roadway	Listings Located Between 1/4-mile - 1/2-mile of Proposed Roadway	TOTAL
LUST	2	5	10	17
UST	2	4	2	8
AST	0	2	1	3
RCRA-SQG	0	1	0	1
RCRA-NonGen	0	0	2	2

EDR HIST AUTO	2	0	0	2
SHWS	0	0	2	2
SEMS-ARCHIVE	0	0	2	2
ECHO	0	0	1	1
SPILLS	1	0	0	1
NPDES	1	0	1	2
TIER 2	2	0	0	2
Total	14	12	22	48

There were a total of 17 petroleum releases (listed in the LUST database) associated with 11 properties that were within ½-mile of the proposed roadway. Of these, two sites were located at a distance of less than 500 feet from the proposed roadway. More specifically, First State Chevrolet identified by the address 22694 Dupont Boulevard was identified to be across Route 113 from the proposed roadway and the Sussex County Fire Marshall identified by the address 22705 Park Avenue was identified to be partially within the limits of proposed roadway. The LUST database cases associated with both of these properties are listed

as closed and inactive. First State Chevrolet is also associated with the only SPILLS database case listed in the EDR report. Four additional sites with associated LUST database cases were less than ¼ mile from the proposed roadway: Three Bells Market identified by the address 517 South Bedford Street, J & G Auto Sales, AP Croll & Son Inc. identified by the address 22997 Lewes Georgetown Highway, and Sewage Pumping Station identified by the address 420 South Bedford Street. Five additional sites with associated LUST database cases are located between ¼-mile and ½-mile of the proposed roadway.

5.0 Conclusions

Based on the results from the EDR Report, 17 LUST database cases were identified but none are listed as “Open” or “Active” cases. No RECs were identified; however, several “Controlled RECs” have been identified. Controlled RECs are defined as sites associated with a previous release of hazardous substances or petroleum products that have been addressed to the satisfaction of the applicable regulatory agency. Although these sites have received regulatory case closure, hazardous substances or petroleum contamination may still remain in place at the site. For most database listings, it is difficult to determine from the EDR report how much of a substance was released, how much was removed, and whether hazardous substances remain in place. Additionally, there is the potential that reported releases or spills associated with the sites listed in **Table 3-1** may have impacted soil and/or groundwater adjacent to or within the project area.

Eleven sites have been identified to have historical petroleum releases (LUST database listings) associated with them; however, all sites have received regulatory case closure. These sites are considered to be “Controlled RECs.” Following are the identified LUST sites:

Identified LUST sites with potential for property to be acquired.

- Sussex County Fire Marshall; 22705 Park Ave (1 LUST – case closed)

Identified LUST sites located at a distance less than 500 feet from the proposed roadway:

- First State Chevrolet; 22694 Dupont Boulevard (1 LUST– case closed, 1 SPILL)

Identified LUST sites located at a distance greater than 500 feet from the proposed roadway:

- J & G Auto Sales 423; South Bedford Street (1 LUST – case closed)
- AP Croll & Son Inc; 22997 Lewes Georgetown Hwy (1 LUST – case closed)
- MFG Justin Tanks, Inc.; 2 Cedar Creek Ave (3 LUST – case closed)
- Edgehill Drugs; 4 Baltimore Ave (2 LUST – case closed)
- Sewage Pumping Station; 420 South Bedford Street (2 LUST – case closed)
- Three Bells Market; 517 South Bedford Street (1 LUST – case closed)
- Georgetown State Service Center; 546 South Bedford Street (3 LUST – case closed)
- Artcraft Lighting Center; 542 South Bedford Street (1 LUST – case closed)
- Cheer Trans/Home Services; 540 South Bedford Street (1 LUST – case closed)

This Hazardous Materials Technical Report did not include regulatory file reviews of the above-referenced database listings or intrusive site reconnaissance of the identified sites. Interviews of property owners were not performed, sites were not accessed, and site specific information regarding corrective action for the identified facilities was not available.

Should the project advance, prior to or during right of way acquisition, a Phase I Environmental Site Assessment (ESA), consistent with the American Society for Testing and Materials (ASTM) method E1527-13 is recommended for the Sussex County Fire Marshall site. Findings from the ASTM Phase I ESA would be used to determine the applicability for a Phase II ESA (ASTM E1903-11). Any necessary remediation

would be conducted in compliance with federal and state environmental laws and would be coordinated with the EPA, Delaware DNREC, and other regulatory agencies as necessary. The handling and disposal of contaminated materials by the contractor would comply with DelDOT Specification #202560 to ensure handling is consistent with state and federal regulations.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

EXECUTIVE SUMMARY

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/10/2016 has revealed that there is 1 SEMS-ARCHIVE site within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA-SQG site within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA NonGen / NLR sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 07/15/2016 has revealed that there are 4 FINDS sites within the searched area.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within the searched area.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Number of Days to Update: 78

Next Scheduled EDR Contact: 05/01/2017

Data Release Frequency: Quarterly

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: 800-438-2474

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

STATE AND LOCAL RECORDS

SHWS: Hazardous Substance Release Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

VCP: Voluntary Cleanup Program Sites

When a property is contaminated with hazardous substances there are liabilities associated with the cleanup of the site under Federal and State Superfund laws, regardless of who caused the contamination and when it was caused. Because of this liability, old industrial sites (with contamination) located close to well developed infrastructure do not attract developers or buyers. These individuals prefer to purchase pristine property without contamination known as "greenfield." Under the Voluntary Cleanup Program (VCP) developers and buyers performing the cleanup of contaminated properties would be provided the much needed protection from potential liabilities for past contamination. Thus, they can proceed with the purchase or development of the property with the assurance that they will not be held liable for environmental problems that were a result of past practices at the site.

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

SUBJECT: No Further Action Required – Conditional

Dear Mr. Rohlfsing:

Background

The Department of Natural Resources and Environmental Control, Tank Management Section (DNREC-TMS) employed State of Delaware funding to investigate and remediate petroleum contamination at the above-referenced facility. The DNREC-TMS has reviewed all documentation submitted to date concerning the petroleum release, discovered in October 2007. Based on recent data submitted for this site, the risk-based cleanup goals established for this site have been achieved. In addition, all necessary closure documentation has been submitted for our records.

Outcome

Based on the documentation submitted to date regarding this release, it appears that the contamination remaining in the subsurface is limited in extent. Therefore, any residual contamination at this site should not pose a threat to human health and safety, or the environment. Consequently, no further action (NFA) is required at the above-referenced location at this time, *as long as the residual contamination onsite remains undisturbed or the use of the site does not change*. Essentially, the site may be used “as is,” *subject to the following conditions*:

- If the petroleum compounds remaining in the soil or ground water on-site are disturbed in the future by digging, boring, dewatering or other means, a contaminated materials management plan must be approved in advance by DNREC-TMS prior to engaging in such activities.
- Any petroleum impacted excavated soils may not be re-used as “clean fill.” Any on-site re-use of excavated soils must be approved in advance by DNREC-TMS.
- If petroleum impacted excavated soils are transported off-site, they must be hauled by a State-licensed solid waste hauler and disposed or remediated in an approved manner.

This NFA letter pertains *only* to petroleum released from the three (3) 2,000-gallon gasoline, one (1) 1,000-gallon gasoline, one (1) 1,200-gallon gasoline and one (1) 1,200-gallon unknown underground storage tanks formerly at the above-referenced location. Also, the NFA letter is *only* applicable under 7 Del. C. Chapter 60, 7 Del. C. Chapter 74, and DE Admin. Code 1351, State of Delaware *Regulations*

Delaware's good nature depends on you!

Governing Underground Storage Tank Systems (the UST Regulations), and does not represent a determination under any other Federal, State or local law.

In addition, pursuant to the UST Regulations and 7 Del.C., Chapter 74, this letter does not release the Responsible Parties from liability for any future problem related or unrelated to the October 2007 release or the underground storage tanks currently and/or formerly at this location. If any new releases are identified, immediate action must be taken to eliminate any threat to public health and safety, and to the environment, and DNREC-TMS must be notified.

Next Steps

In all cases, DNREC-TMS reserves the right to re-assess the site in the future if new information comes to light regarding possible petroleum contamination.

Please note that upon issuance of this NFA letter by DNREC-TMS, State funding eligibility for this facility will be closed. Any costs associated with managing residual contamination after site closure will not be covered by State funds.

If you have questions or concerns, please feel free to call me at (302) 395-2500.

Sincerely,

Amy E. Bryson
Hydrologist
